Твердотельные реле

- Трехфазные твердотельные реле
- Однофазные твердотельные реле
- Твердотельное реле постоянного тока в постоянное SSR
- Твердотельные реле управления
- Реле SSR для монтажа на DIN-рейку
- Твердотельные реле перекидного типа SSR
- Твердотельные реле с несколькими выходами
- Твердотельные реле реверса двигателя
- Радиатор для твердотельных реле

Твердотельные реле (ТТР) представляют собой серию *однополюсных, нормально разомкнутых, полупроводниковых коммутационных устройств без движущихся частей, способных выполнять десятки миллионов циклов срабатывания* . Он предназначен для управления переменным током 120 В, 240 В или 480 В (до 660 В) и обеспечивает коммутацию при нулевом напряжении и изоляцию 2500 В переменного тока между клеммами нагрузки и управляющим сигналом.

Управляющий сигнал заставляет твердотельное реле (SSR) включать или выключать нагрузку переменного тока так же, как это делает обычный механический контактный переключатель, но без проблем, связанных с реле с подвижным контактом, таких как коррозия, точечная коррозия, искрение, радиочастотные помехи. (RFI) и отказов. ***Результат: значительно более длительный срок службы твердотельного реле (ТТР)*** . Преимущества твердотельного реле перед механическими реле из Википедии.

Твердотельные реле / реле / роли / переключатели / модули Greegoo, покрывающие панель, DIN-рейку и печатную плату твердотельных реле, реле управления, силовые модули и сборки SSR. *Переключение через ноль для резистивных нагрузок или случайное возгорание для индуктивных нагрузок. Твердотельные реле Greegoo являются хорошей заменой твердотельным реле omron, celduc, fotek или crydom и т. д.*

Трехфазные твердотельные реле

GTK33 3A/6A SSR 3Phase DIN-рейка с радиатором

Трехфазные твердотельные реле 3A и 6A, монтаж на DIN-рейку, 6A с радиатором.

10-40A 3-х фазное твердотельное реле

10A, 15A, 25A, 40A TTP, 3 фазы, трикс выход, экономичный тип.

40A-120A 3-х фазные твердотельные реле

Полупроводниковый переключающий контактор, выход SCR, 40A, 60A, 80A, 100A, 120A SSR, 3-фазные реле SSR.

Трехфазное твердотельное реле 160A/200A

160A и 200A 3-х фазное твердотельное реле.

Трехфазные твердотельные реле 200-400A

Трехфазное твердотельное реле от 200 до 400 А, выходное напряжение 40–660 В переменного тока, переход через ноль.

400-500A 3-х фазные твердотельные реле

Твердотельные реле 400A, 500A, трехфазные, панельного монтажа.

Твердотельные контакторы

Полупроводниковое реле, полупроводниковый контактор, 3-фазные полупроводниковые контакторы, комбинированные сборки твердотельных реле с радиатором и вентилятором, от 40 до 1800 А, готовые к использованию.

Однофазные твердотельные реле

Твердотельное реле 1-5A

Твердотельные реле постоянного тока 1A, 2A, 3A и 5A, монтаж на печатной плате.

Твердотельные реле постоянного тока в переменный

Твердотельные модули постоянного тока в переменный SSR-10DA, SSR-25DA, SSR-40DA, симисторы SSR, экономичного типа.

1-фазные твердотельные реле

Винтового типа с зажимным креплением 1 фаза ssr.

Выход симистора 10-40A твердотельный стержень

Твердотельные реле от 10 до 40 А, однофазные, симисторный выход, экономичного типа.

Однофазное твердотельное реле 40-120A

Однофазное твердотельное реле от 40 до 120 А, твердотельное реле 12 В / 24 В, твердотельное реле 25 А / 40 А / 60 А / 80 А / 100 А / 120 А. Твердотельные реле с пересечением нуля и реле произвольного управления.

Твердотельные реле 60-150A SSR

Твердотельные реле от 60 до 150 А, однофазные, модульного типа.

Твердотельные реле 200-400A

Твердотельные реле модульного типа от 200 до 400 А.

Твердотельные реле 500-1600A ccp

Твердотельные реле 500–1600 А

Твердотельное реле для конденсаторов

Твердотельные реле серии 60A и 80A GDF в основном используются для включения и выключения силовых конденсаторов.

Конденсаторные твердотельные реле

Твердотельные реле серии GDF на 120A и 250A в основном используются для включения и выключения силовых конденсаторов.

Твердотельное реле постоянного тока в постоянное SSR

1/2/3/5A постоянного тока Твердотельное реле

1A, 2A, 3A и 5A DC SSR, 100B DC, 200B DC и 400B DC.

10–200 А постоянного тока в постоянное твердотельное реле

Твердотельные реле от 10 до 200 А, от 100 до 1200 В пост. тока, монтаж на панели.

Твердотельные реле постоянного тока GDR08 120–2000 А при 1200 В постоянного тока

Постоянный ток: 120–2000 А, твердотельные реле от 100 до 1200 В постоянного тока.

Твердотельное реле постоянного тока с защитой от перегрузки по току и перенапряжению

Твердотельное реле постоянного тока, 120–2000 А, 100–1200 В постоянного тока, тип защиты от перегрузки по току и перенапряжению.

Твердотельные регуляторы постоянного тока

Твердотельные регуляторы постоянного тока от 10 до 2000 А, от 24 до 1200 В постоянного тока, внешний сигнал напряжения 0–10 В постоянного тока или потенциометр 10K.

100A DC SSR для преобразователей частоты

Конструкция модуля шириной 25 мм.

200A DC SSR для преобразователей частоты

200A, конструкция модуля шириной 34мм.

300A/400A DC SSR для преобразователей частоты

300A и 400A, модульная конструкция, ширина 53мм.

Контакторы постоянного тока для преобразователей частоты

Контактор постоянного тока серии GFDC используется для цепей постоянного тока с номинальным рабочим напряжением постоянного тока до 48 В постоянного тока и рабочим током до 800 А.

Твердотельные реле управления

4-20 мА или 0-5 В или 10K реле управления входом потенциометра SSR

3 в 1, вход потенциометра 4-20 мА или 0-5 В или 10K, реле управления SSR от 10 до 120 А.

Однофазные полупроводниковые регуляторы переменного тока от 10 до 180 А

Однофазные полупроводниковые регуляторы переменного тока от 10 до 180 А

Однофазные полупроводниковые регуляторы переменного тока от 60 до 300 А

Однофазный полупроводниковый регулятор переменного тока от 60 до 300 А

Однофазные полупроводниковые регуляторы переменного тока от 350 до 500 А

Однофазный полупроводниковый регулятор от 350 до 500 А

Реле SSR для монтажа на DIN-рейку

G3DA4810 SSR 1 КАНАЛ 10А

G3DA4810, SSR 1 КАНАЛ, 10A@48-600VAC, 4-32VDC,

Реле G3DA4825 SSR

25A SSR, встроенный радиатор, монтаж на DIN-рейку

Реле G3DA4840 SSR

40A SSR, встроенный радиатор, монтаж на DIN-рейку

Твердотельные реле G3DA4860 SSR

60A SSR, встроенный радиатор, монтаж на DIN-рейку

Твердотельные реле с воздушным охлаждением

Однофазный, от 10 до 80 А, 440 В переменного тока

Твердотельные реле с воздушным охлаждением

3 фазы, от 10 до 80 А, 440 В переменного тока

Твердотельные реле перекидного типа SSR

Твердотельные реле

Твердотельные реле от 10 до 100 А, однофазные, трехфазные, от постоянного тока к переменному, от постоянного к постоянному, от переменного к переменному.

Твердотельные реле перекидного типа

Сильные изоляционные характеристики, полный патч-процесс с двойной панелью SMT, сильная помехоустойчивость

Твердотельные реле с несколькими выходами

Двойные твердотельные реле

Двойной выход SSR, выход SCR, от 10 до 80 А, одна фаза.

Твердотельное реле с двумя выходами до 120A

60A, 80A, 100A и 120A твердотельные реле с двойным выходом.

Твердотельные реле реверса двигателя

Твердотельные реле реверса двигателя постоянного тока 1A-100A 12V-200VDC

Твердотельное реле переключения двигателя постоянного тока вперед и назад, постоянный ток: от 1 до 100 А, 12–200 В постоянного тока

Реверсивный твердотельный контактор постоянного тока 10A-500A 100V-1200V

Твердотельное реле переключения двигателя постоянного тока вперед и назад, 10–500 А, 100–1200 В постоянного тока.

Твердотельные реле реверса трехфазного двигателя

от 10A до 150A, 3 фазы 3 управления

Твердотельное реле реверса однофазного двигателя

Реверсивные контакторы однофазного двигателя от 10 до 400 А, 110 В/220 В переменного тока.

Радиатор для твердотельных реле

Радиатор CCP-1

Для однофазных твердотельных реле от 10 до 80 А.

Радиатор CCP-3

Радиатор/радиатор для TTP от 10 до 40 А, трехфазные твердотельные реле.

Радиатор SSR-3F для SSR

Радиатор с осевым вентилятором для трехфазных твердотельных реле, от 10 до 60 А.

Зажимы крепления TS35P (переходник на DIN-рейку)

Зажимы крепления GREEGOO TS35P на DIN-рейку 35 мм, переходник на DIN-рейку

Characteristics

- SPT chip (soft-punch-through)
- MOS input control
- Ultrathin IGBT chip, great current low loss, low tail current
- Low VCE (sat) saturated voltage, positive temperature coefficient at high temperature
- High switch frequency, low switch loss
- High SC resistive ability
- Module creepage long distance design
- DBC insulated voltage above 2500VRMS

Typical Applications

- AC and DC electric motor control
- Frequency transformer
- UPS
- Industry calefaction power supply
- Electric welding machine

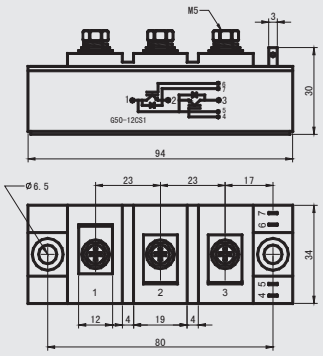
Characteristic

- SPT:Soft-punch-through technologe
- VCE(sat)with positivetemperature coefficient
- Lower on-state and switching loss
- Hight short circuit capability
- “vacuum+H2+H” process gasatmosphere,Nearly voidlesssoldering results1234567

Dimensions



G50-12CS1 Technical details

Characteristic values

	Symbol	Conditions	values			Unit
IGBT						
Collector-emitter voltage	VCES		1200			V
DC-collector current	IC	Tc=25(85)℃		75(50)		A
repetitive peak voltage	ICRM	Tc=25(80)℃, tp=1ms		150(100)		A
gate-emitter peak voltage	VGES		±20			V
operation temperature	Tvj		-40~+125			℃
storage temperature	Tstg		-40~+150			℃
insulation test voltage	VISOL	RMS, 1min, 50Hz	2500			V
Inverse diode						
DC-forward current	IF	Tc=25(80)℃	75 (50)			A
repetitive peak forward voltage	IFRM	Tc=25(80)℃, tp=1ms	150 (100)			A
forward surge current	IFSM	tp=10ms, sin, Tj=150℃	500			A

Characteristic values

Paramiter	Symbol	Conditions	values			IGBT
			typ.	typ.	max.	
IGBT						
gate threshold voltage	VGE(th)	VGE=VCE, Ic=2mA,Tj=25℃	4.5	5.5	6.5	V
collector-emitter cut-off current	ICES	VGe=0V, Vce=VCES, Tj=25(125)℃		0.1	0.3	mA
gate-leakage current	IGES	VGE=0V, VGE=20V, Tj=25℃	-200		200	nA
collector-emitter threshold voltage	VCE (TO)	Tj=25 (125)℃		1(0.9)	1.15(1.05)	V

Typical applications

- AC and DC electric motor control;
- Frequency transformer;
- UPS;
- Industry power supply;
- Electric welding machine.

Characteristics

- SPT chip (soft-punch-through);
- MOS input control;
- Ultra thin IGBT chip, great current, low loss, low tail current;
- Low VCE (sat) saturated voltage, positive temperature coefficient at high temperature;
- High switch frequency, low switch loss;
- High SC resistive ability;
- Module creepage long distance design;
- DBC insulated voltage above 2,500V RMS.

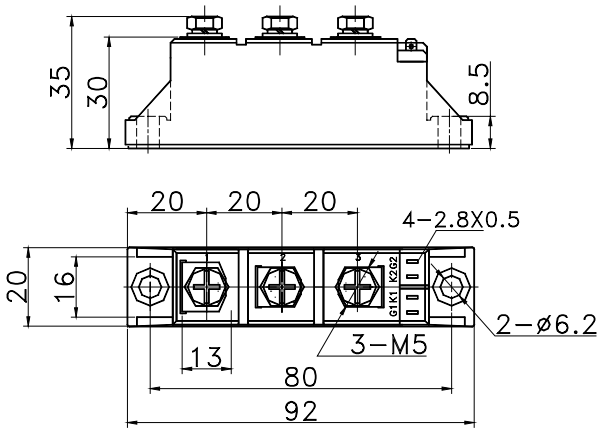
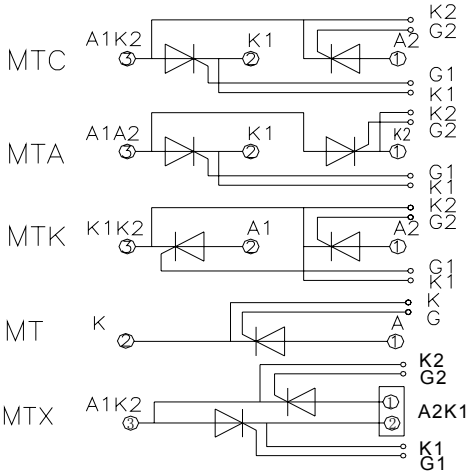
Outline:



215F3



Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

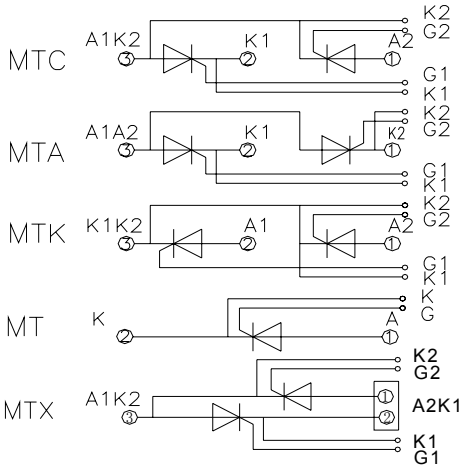
214F3



Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

W_t	Weight				2600		g

Outline:

409F3

Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

$I_{T(AV)}$	1000A

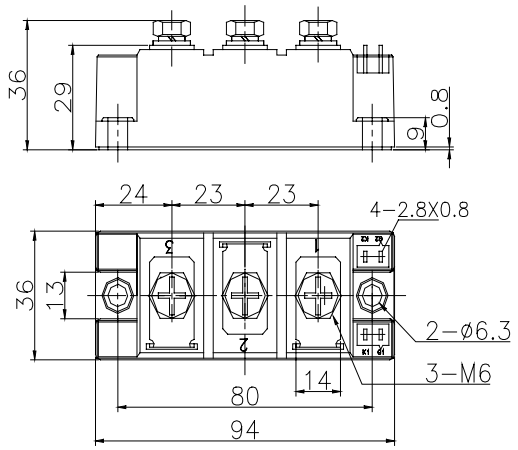
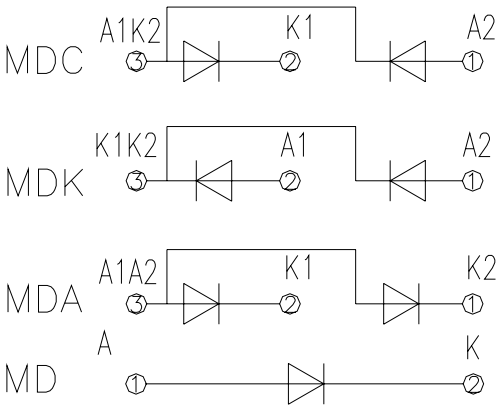
V_{FM}	Peak forward voltage	I_{FM}=550A	25			1.43	V
$R_{th(j-c)}$	Thermal resistance Junction to case	At 180° sine, Single side cooled				0.220	°C /W
$R_{th(c-h)}$	Thermal resistance case to heatsink	At 180° sine, Single side cooled				0.08	°C /W
V_{iso}	Isolation voltage	50Hz,R.M.S,t=1min,I_{iso}:1mA(max)		2500			V
F_m	Terminal connection torque(M5)				6		N·m
	Mounting torque(M6)				6		N·m
T_{stg}	Stored temperature			-40		125	°C
W_t	Weight				320		g

Outline:





Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

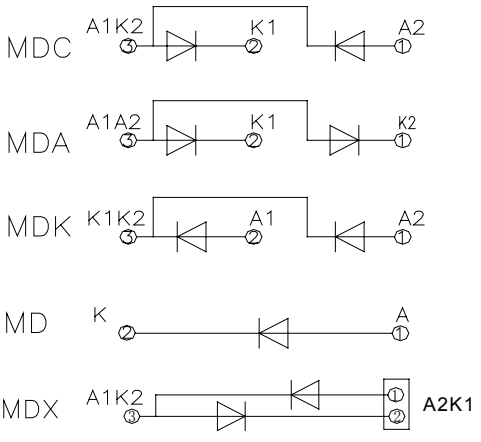
412F3



Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

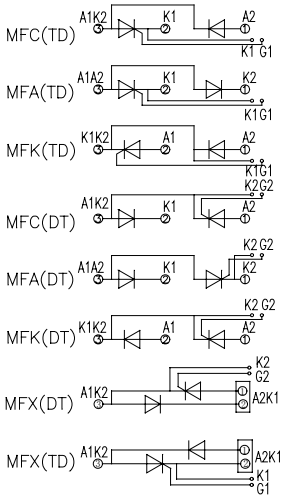
215F3



Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

214F3

Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

Outline:

402F3

Features:

- Isolated mounting base 2500V~
- Pressure contact technology with
- Incrtased power cycling capability
- Space and weight savings

Typical Applications:

- AC/DC Motor drives
- Various rectifiers
- DC supply for PWM inverter

GREEGOO™

GREEGOO ELECTRIC

The Power Management Leader

Rectifier Diode & Thyristor
Introduction

Company Profile

GREEGOO Electric Co., Ltd, located in Wenzhou, the electric capital of China, is specialized in developing, manufacturing and distributing phase control thyristors, rectifier diodes, high frequency thyristors, fast recovery diode and fast switching thyristors along with about 300 components.

Owning skilled workers, advanced equipment and strict quality control process, GREEGOO has passed ISO9001:2000 and obtained CE and KEMA certificates. Our products are enjoying high popularity in Russia, France, Italy, Spain,Australia, India, Korea, Iran, Saudi, South Africa and Brazil etc. Especially, our phase control thyristor SCR and rectifier diodes have been cooperating well with Sansung, Hyundai in Korea, ABB in Belgium, also I&R in india and win good reputation from the buying public.

GREEGOO in Chinese means "Honest, Prosperous and Fortunate". While retrospecting to its origin, GREEGOO pronounces similar to the Chinese name of SILICON VALLEY in USA and is a symbol of high technology & excellent quality. Based on it, GREEGOO will march forward steadily in international market with customers all over the world hand by hand!

RECTIFIER DIODE & THYRISTOR

GREEGOO

Avalanche thyristors

Features

- Hermetic metal case with ceramic insulator.
- Precise internal pressure contacts for high resistance to power cycling.
- Guaranteed maximum avalanche power dissipation in reverse direction.

Typical applications

- Controlled and half-controlled rectifiers.
- AC controllers.
- High power drives for industrial and traction applications.

Type designations thyristors

T □ □ □ □ □ □ □ □ □ □

1 2 3 4 5 6 7 8 9 10

1: Letter code T, for “thyristor”

2: Letter code for subtype of thyristor: B-fast, BH-fast switching, TC-triac, L-avalanche

3: Serial number of construction modification

4: Designation of modification according to hexahedron size for stud thyristors or according to case diameter for press-pack thyristors

5: Designation of constructive design of case

6: Max. Mean on-state current, max. RMS forward current for triacs, max. Turn-off current for GTO (A)

7: Class according to VDRM, VRRM

8: Group according to (dVD/dt) crit

9: Group according to tq

10: Group according to tgt (for TB and TBH)

Phase control thyristors

Features

- Hermetic metal cases with glass insulators.
- Threaded studs M5, M6, M8, M10, M12, M20 and M24.
- International standard cases.
- High values V_{DRM}, V_{RRM}.
- Low losses on-state(especially T271-320).

Typical applications

- Controlled and half-controlled rectifiers.
- DC motor control.
- AC controllers (e.g. for temperature control).

Phase control thyristors

Features

- Hermetic metal cases with ceramic insulator.
- Capsule packages for double-sided cooling.
- Amplifying gates.
- Optimized for low on-state losses.
- Suitable for series and parallel connections, narrow Q_{rr} and V_{TM} deflection.

Typical applications

- DC motor control.
- Controlled rectifiers.
- AC controllers.
- "Soft" starters for AC motors.
- High voltage SM-drives up to 30 MW.

Phase control thyristors

Features

- Hermetic metal cases with ceramic insulator.
- Capsule packages for double-sided cooling.
- Amplifying gates.
- Optimized for low on-state losses.
- Suitable for series and parallel connections, narrow Q_{rr} and V_{TM} deflection.

Typical applications

- DC motor control.
- Controlled rectifiers.
- AC controllers.
- "Soft" starters for AC motors.
- High voltage SM-drives up to 30 MW.

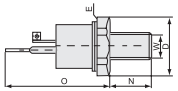
Triacs

Features

- Wide line of designs.
- Hermetic metal cases with glass and ceramic insulators, threaded stud and capsule designs.
- Single and double polar drive.

Typical applications

- Illuminating engineering products (regulation of light sources in industry and home applications).
- Electrothermal equipment (temperature regulation).
- Motors (regulation of rotation speed and of the reversing gear) textile and sewing industry, passenger and freight lifts, washing machines.



Small-sized series

Fast thyristors

Features

- Hermetic metal cases with glass and ceramic insulators.
- International standard cases.
- Low turn-off.
- High dv/dt endurance.
- Amplifying gate.
- Low turn-off.

Typical applications

- Small power drives.
- Control of single-phase motor in home appliances.
- Inductive heating.
- Electronic welders.
- High power drives for industrial and traction applications.
- Electronic welders.
- Uninterruptable power supplies.

Fast switching thyristors

Features

- Hermetic metal cases with ceramic insulators, threaded stud and capsule designs.
- Low switching losses.
- Short turn-off time.
- Interdigitated amplifying gate for fast turn-on and high di/dt.

Typical applications

- High power drives for industrial and traction applications.
- Inductive heating.
- Electronic welders.
- Uninterruptable power supplies

Fast switching thyristors

Features

- Hermetic metal cases with ceramic insulators, threaded stud and capsule designs.
- Low switching losses.
- Short turn-off time.
- Interdigitated amplifying gate for fast turn-on and high di/dt.

Typical applications

- High power drives for industrial and traction applications.
- Inductive heating.
- Electronic welders.
- Uninterruptable power supplies

Rectifier diodes

Features

- Hermetic metal cases with glass and ceramic insulators.
- With letter "X"-cathode to stud.
- Without letter "X"-anode to stud.
- Reverse voltages up to 1800V.

Typical applications

- All-purpose small, mean and high power rectifier diodes.
- Non-controllable and half-controllable rectifiers.

Type designations thyristors

D	□	□	□	□	□	X	□	□
1	2	3	4	5	6	7	8	9

1: Letter code D, for "diode"
2: Letter codes for subtype of diodes:
L- Avalanche (avalanche diode)
F- Fast recovery diode
3: Serial number of construction modification
4: Designation of modification according to hexahedron size for stud diodes or according to case diameter for press pack diodes
5: Designation of constructive design of case
6: Max. Average forward current (A)
7: X- Reverse polarity
8: Class according to repetitive voltage (VRRM)
9: Group according to trr (for AU)

Rectifier diodes

Features

- Hermetic metal cases with glass and ceramic insulators.
- With letter "X"-cathode to stud.
- Without letter "X"-anode to stud.
- Reverse voltages up to 1800V.

Typical applications

- All-purpose small, mean and high power rectifier diodes.
- Non-controllable and half-controllable rectifiers.

Rectifier diodes

Features

- Capsule type metal-ceramic packages with pressure contacts.
- Reverse voltage up to 6000V.
- Lowon-statevoltage,narrowVF-deflectionforparalleloperation.
- Contact diameters 19, 33,37,50,63 and 78mm

Typical applications

- All-purpose high power rectifier diodes.
- High power drives for industrial and traction applications.
- Welding.
- Electroplating.

Rectifier diodes

Features

- Capsule type metal-ceramic packages with pressure contacts.
- Reverse voltage up to 6000V.
- Lowon-statevoltage,narrowVF-deflectionforparalleloperation.
- Contact diameters 19, 33,37,50,63 and 78mm

Typical applications

- All-purpose high power rectifier diodes.
- High power drives for industrial and traction applications.
- Welding.
- Electroplating.

Avalanche rectifier diodes

Features

- Hermetic metal cases with glass and ceramic insulators, threaded stud and capsuledesigns.
- Guaranteed maximum avalanche power dissipation.

Typical applications

- DC supply for magnets and solenoids (brakes, valves, etc.).
- Non-controllable and half-controllable rectifiers.
- High power drives for industrial and traction applications.

Fast recovery diodes

Features

- Hermetic metal cases with glass and ceramic insulators.
- Small recovered charge.
- "Soft" recovery.
- High di/dt capability at turn-off.

Typical applications

- Inverse diodes for transistors, GTO and asymmetric thyristors.
- Inverters, choppers. A.C. motor control.
- Uninterruptable power supplies.

Semiconductor Device

Rectifier diode & thyristor (General purpose)

Standard recovery diode

Features

- High surge current capability
- Avalanche types available
- Stud cathode and stud anode version
- Wide current range
- Types up to 1200V VRRM
- RoHSCOmpliant

Applications

- Battery charges
- Converters
- Power supplies
- Machine tool controls

Phase control thyristor SCR

Features

- Improved glass passivation for high reliability
- and exceptional stability at high temperature
- High di/dt and dv/dt capabilities
- Standard package
- Low thermal resistance
- Metric threads version available
- Types up to 1200V V_{DRM}/V_{RRM}
- RoHS Compliant

Applications

- Medium power switching
- Phase control applications
- Can be supplied to meet stringent military, aerospace and other high-reliability requirements

GREEGOO

2

Type and meanings

G 50 KK E
1 2 3 4

1:Greegoo
2: Diameter of chips
3: Model no:
KP: phase control thyristor
KK: fast turn-off thyristor
KA: high-frequency thyristor
KS: bi-directional thyristor
ZP: rectifier diode
ZK: fast recovery diode
DS: super high speed semiconductor switch
4: Class according to V_{DRM}, V_{RRM}
C:400~1000V
E:1100~1800V
H:1900~3000V
J:3100~4500V

Phase control thyristor

Features

- Full diffusibility
- Disc type hermetic ceramic seal
- Center-amplifying gate structure
- Double side cooling
- Big current

Applications

- Hi power convertor
- AC/DC motor control
- AC/DC switch
- Phase control rectifying
- Active and negative inverter

Semiconductor Device

Rectifier diode & thyristor (General purpose)

Type and meanings

G 50 KK E
1 2 3 4

1:Greegoo
2: Diameter of chips
3: Model no:
KP: phase control thyristor
KK: fast turn-off thyristor
KA: high-frequency thyristor
KS: bi-directional thyristor
ZP: rectifier diode
ZK: fast recovery diode
DS: super high speed semiconductor switch
4: Class according to V_{DRM}, V_{RRM}
C:400~1000V
E:1100~1800V
H:1900~3000V
J:3100~4500V

Fast turn-off thyristor

Features

- Full diffusibility
- Center-amplifying gate structure
- Excellent dynamic characteristics
- Fast-switching performance
- Low-switching consumption
- Disc type hermetic ceramic seal
- Double side cooling

Applications

- Inverter
- Wavechopper
- Induction heating
- Different kinds of forced current convertor

High frequency thyristor

Features

- Full diffusibility
- Distributed and expansive amplifying gate structure
- Low-switching consumption
- Excellent dynamic characteristics
- Excellent high-frequency performance, suitable for 2.5KHz-10KHz
- Disc type hermetic ceramic seal
- Double side cooling

Applications

- Inverter
- Welding machine
- Wave chopper

Note: * is old model and subject to our confirmation when ordering

Remark

- I_{GT}, V_{GT}, Ih are the tested values under 25℃ and other parameters in the table are under Tjm unless there are extra explanations
- $I^2t=I^2_{TSM} \times t_w/2$; t_w=Sine and half wave current full-bottomed
- When working at 60Hz: I_{TSM}(8.3ms)=I_{TSM}(10MS)x1.066, $T_j=T_{jm}$
  I^2t(8.3ms)=I^2t(10ms)x0.943, $T_j=T_{jm}$
- V_{TO}: threshold voltage; r_T: slope resistance
- Gate lead: white or colorless; Cathode lead (when needed): red

Bi-directional thyristor(triacs)

Features

- Full diffusibility
- Center gate
- Disc type hermetic ceramic seal
- Double side cooling
- Virtual to two phase control thyristors
- Anti-parallel
- To give a suitable gate current, both normal side and reverse side can work.

Applications

- No-contact AC switch
- AC power adjustment and control

Type and meanings

G 50 KK E

- $I^2t=I^2_{TSM} \times t_w/2$; t_w=Sine and half wave current full-bottomed
- When working at 60Hz: I_{FSM}(8.3ms)=I_{FSM}(10MS)x1.066, $T_j=T_{jm}$
  I^2t(8.3ms)=I^2t(10ms)x0.943, $T_j=T_{jm}$
- V_{FO}: threshold voltage; R_F: slope resistance

Semiconductor Device

Rectifier diode & thyristor (General purpose)

GREEGOO

Fast recovery diode

Features

- Diffusibility
- Short recovery time
- Small reverse recovery charge
- Fast and soft recovery characteristics
- Disc type hermetic ceramic seal
- Double side cooling

Applications

- Motor control and dirve
- Induction heating
- UPS
- Wavechopper
- Welding equipment

Fast switching thyristors

Features

- Double-sidecooling
- Low switching loss
- Shorter turn-off time

Applications

- M.F. Inductive heating systems
- DC choppers
- Pulse electrical power supplies

Freewheeling diodes & snubber diodes

Features

- Double-sidecooling
- High mean current
- High surge current

Applications

- High power drive
- High voltage supplies
- Motor control

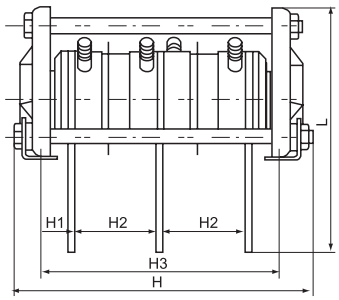
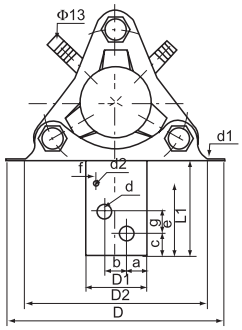
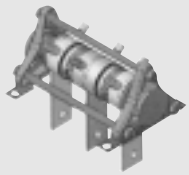
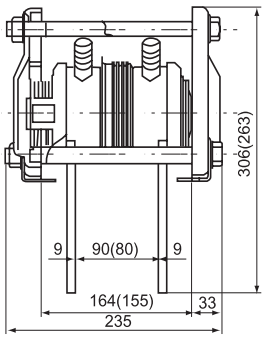
Application	Thisproductappliesto500~2000Aelementassemblings, waterflow⩾6L/Min1500~2000Aelementswaterflow⩾7L/Min				

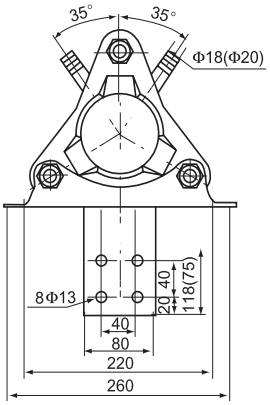




SS15 Monopipe Water Cooling Heatsink (Fig.5)



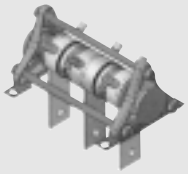




SS15BL Doublepipe Water Cooling Heatsink (Fig.6)

Types	Surface diameter	Applicablecase surface	Mountingforce P(KN)	Thermalresistance (℃ /W)
SS15,SS15BL	ϕ100	ϕ73~ ϕ100	60~70	0.011
Application	Thisproductappliesto2000~3000Aelementassemblings,waterflow⩾8L/Min			

SS Series Water Cooling Heatsink



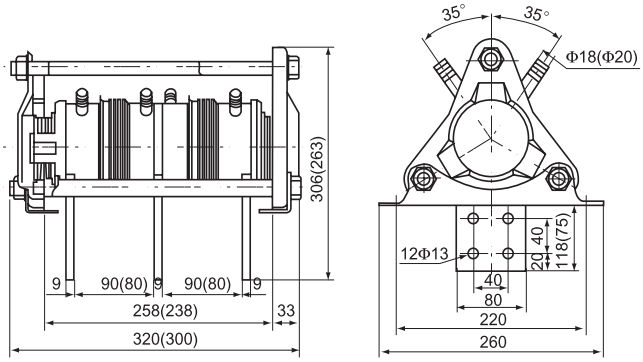
Features

- Compatible with SS14, SS15 Series
- Water Cooling Heatsinks respectively
- High efficiency heat transfer water-cooling design inside the heatsink
- Ultra low low thermal resistance, high heat-sinking capability
  Manifold mounting structures

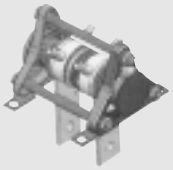
Typical Application

- UHP capsule devices
- High-power eliminator supply
- High-power induction heating supply

SS15BL Doublepipe Water Cooling Heatsink (Fig.6)



SS2x Series Water Cooling Heatsink

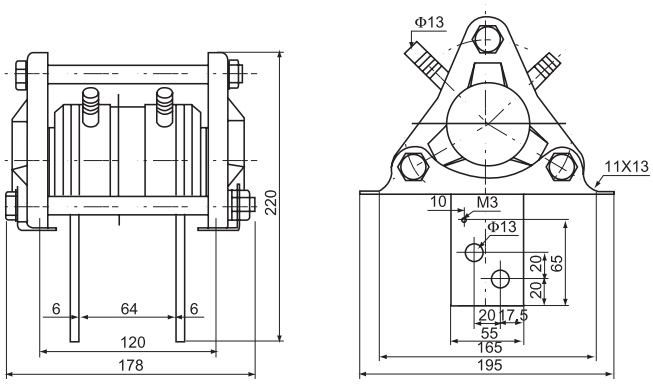


SS24, SS25: improved types of SS14, SS15 Series Water Cooling Heatsink

Type	Surface diameter	Applicable devices	Mounting force P(KN)	Waterflow (L/Min)	Thermal resistance(℃/W)
SS24Series	ϕ 84	Capsule rectifiers and thyristors of 50~84 in surface diameter	18~70	⩾ 6	0.010
SS25Series	ϕ 100	Capsule rectifiers and thyristors of 70~100 in surface diameter	60~100	⩾ 8	0.008

SS2X Series Heatsinks are compatible with SS14, SS15 Series completely, please refer to Fig.7~Fig.10

SS24(Fig.7)

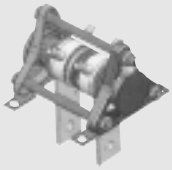


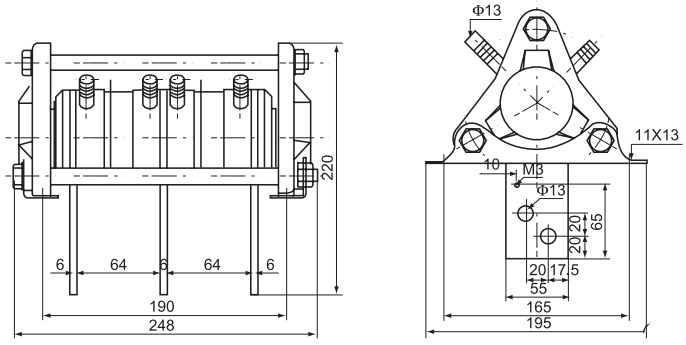
Semiconductor Device

Heatsink for thyristor & rectifier diode

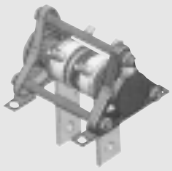
SS2x Series Water Cooling Heatsink

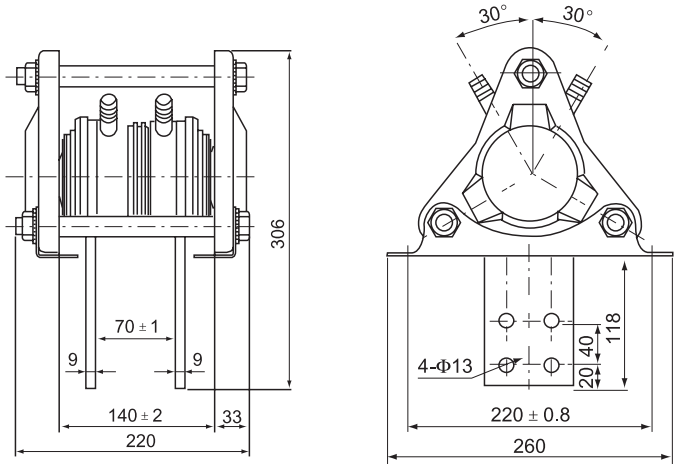
SS24BL(Fig.8)



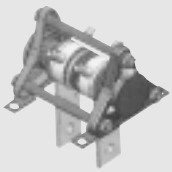


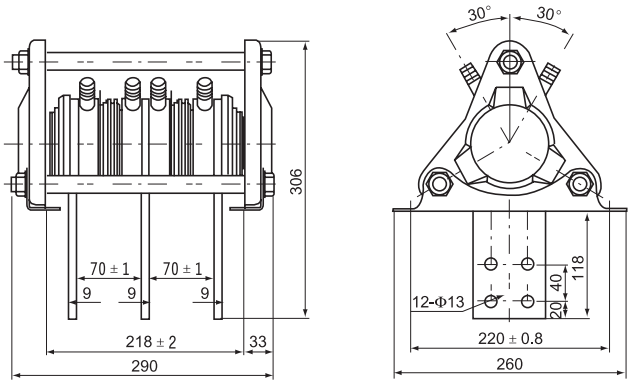
SS25(Fig.9)

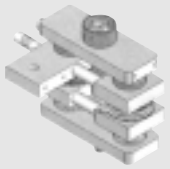




SS25BL(Fig.10)





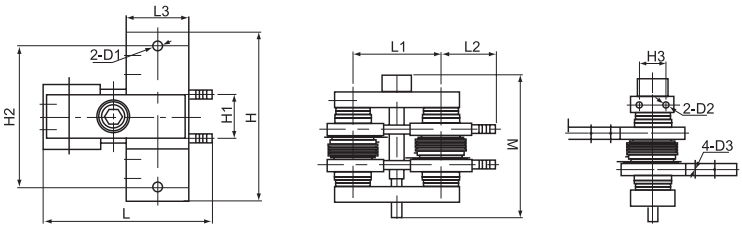


D-Type Water Cooling Heatsink

DSS3, DSS5, DSS6, DSS8 Water Cooling Heatsink (Fig.11)

Type	Outline size						Mountingsize					
	L	L1	L2	L3	H	H1	H2	H3	D1	D2	D3	Wmax
DSS3	140	70	50	40	118	25	88	25	ϕ8.2	M5x7	M3x6	135
DSS5	170	88	57	50	130	30	100	30	ϕ11	M6x15	M3x6	155
DSS6	180	93	59.5	55	151	35	121	30	ϕ11	M6x15	M3x6	155
DSS8	193	100	62	60	190	50	160	30	ϕ11	M6x10	M3x6	160

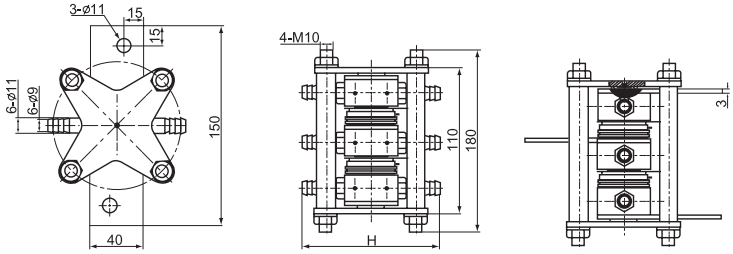
Type	Maximum surface dimension	Applicable case surface	Thermalresistance (℃/W)	Application
DSS3	40X40	ϕ19~ϕ34	0.030	This product applies to 300~800Aelement assmblings,and inverse parallel connection power sets,waterflow ⩾ 4L/Min
DSS5	50X50	ϕ34~ϕ40	0.026	
DSS6	55X55	ϕ34~ϕ45	0.022	
DSS8	60X60	ϕ34~ϕ47	0.018	

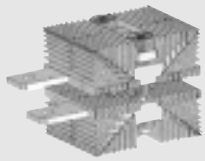


HSS3-type Water Cooling Heatsink

HSS3 Water Cooling Heatsink (Fig.12)

Type	Maximum surface dimension	Applicable case surface	Thermal resistance (℃/W)	Weight (kg)	Application
HSS3	40x40	ϕ19~ϕ34	0.030	2.2	This product applies to 200~400Aelement assmblings, and inverse parallel connection power sets, waterflow ⩾ 4L/Min





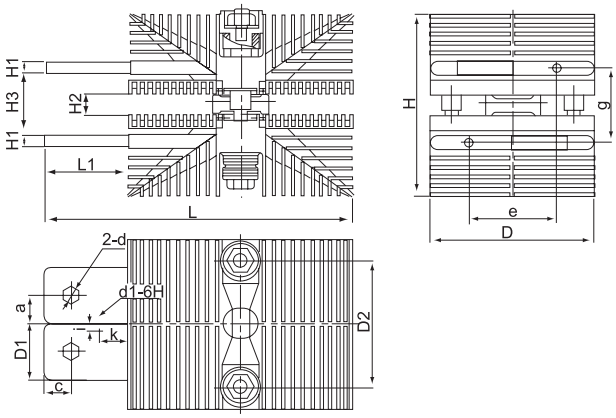
SF Series Air Cooling Heatsink

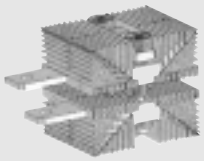
SF12, SF13 Monopipe Air Cooling Heatsink (Fig.13)

Type	Outline size			Arc power lead size				Mounting size									
	L	D	H	L1	D1	H1	D2	H2	H3	d	d1	a	c	e	g	i	k
SF12	200	110	125	60	40	8	80	15	22	ϕ13	M8	20	20	55	30	6	20
SF13	220	120	130	60	40	8	90	15	45	ϕ13	M8	20	20	64	53	6	20

The tolerance of D, H, H2, H3, g are $^{+2}_{-1}$, $^{+5}_{0}$, $^{+3}_{-1}$, $^{+4}_{-1}$, $^{+5}_{-2}$ respectively.

Type		SF12			SF13		
Surface diameter		Plate Surface	Raised Surface		Plate Surface	Raised Surface	
		ϕ65	ϕ23	ϕ27	ϕ65	ϕ27	ϕ27	ϕ31
Applicable case surface	Raised Surface	ϕ19~ϕ40			ϕ34~ϕ40		
	Plate Surface	ϕ24~ϕ28			ϕ28~ϕ32		
Mounting force P (KN)		3.3~20			5.5~25		
Thermal resistance (℃/W)		0.090			0.071		
Flow resistance (Pa)		45			55		
Application		This product applies to 200~800A element assemblings, wind speed ⩾4m/sec					





SF Series Air Cooling Heatsink

SF14, SF15, SF16, SF17 Monopipe Air Cooling Heatsink (Fig.14)

Type	Outline size			Arcpower lead Size			Mounting size
